

VENKATESH MANNURU

Senior Software Engineer | Cloud, Microservices & Security

 (304)-415-4294  mvreddy.mannuru@gmail.com  <https://venkateshmannuru.com/>  New York metropolitan areas, USA

SUMMARY

Senior Full Stack Engineer with 7+ years of experience designing and building distributed, cloud-ready applications across finance, transportation, government, and academic research environments. Strong expertise in C#, ASP.NET Core, REST APIs, Angular UI, SQL Server, MongoDB, and microservice-based architectures. Experienced in secure system design, backend service development, containerized deployments, and code reviews. Published 18 research papers in cybersecurity, focused on attack detection, secure coding, and threat modelling.

EXPERIENCE

Senior .NET Full Stack Engineer

TransCore

 06/2025 - Present  New Jersey, USA

- Designed and maintained .NET backend services using C#, ASP.NET Core, and REST APIs, integrating external APIs and payment services securely.
- Implemented microservice-based components, improving service isolation by 35%.
- Enhanced API performance with a 30% improvement in response time through optimization techniques.
- Reduced production defects by 25% and incident resolution time by 40% through structured code reviews and improved monitoring.
- Increased system availability by 20% by supporting high-availability and disaster recovery environments.
- Collaborated closely with DevOps, infrastructure, and security teams.

Full Stack Developer

Charleston Area Alliance

 01/2025 - 06/2025  WV, USA

- Developed full-stack applications using ASP.NET Core, Angular/React, SQL Server, MongoDB.
- Built and maintained REST APIs supporting internal and external integrations.
- Improved application performance by approximately 25% through frontend and backend optimizations.
- Reduced database load by approximately 30% by optimizing queries and stored procedures.
- Designed background jobs and automation, reducing manual operations by approximately 40%.
- Improved application security by approximately 20% through validation and access controls.

SKILLS

Client-Side

HTML5

CSS3

JavaScript (ES6+)

TypeScript

Angular

React

Bootstrap

Server-Side

C#

.NET Core

ASP.NET Core

Web API

REST APIs

Entity Framework Core

LINQ

SQL Server

T-SQL

MongoDB

MySQL

Redis

Node.js

Python

Scikit-learn

TensorFlow

Development & Operations

Docker

Kubernetes

CI/CD Pipelines

Git

Agile

Scrum

NUnit

xUnit

Jest

PROJECTS

Cloud-Native Microservices & Cybersecurity Platform

 2023 - Present  United states

 Tech: C#, ASP.NET Core, Web API, Docker, Kubernetes, SQL Server, MongoDB, Angular, Python

Designed **cloud-native microservices** using ASP.NET Core and REST APIs; deployed via Docker and Kubernetes.

- Implemented secure API communication, integrated cybersecurity threat-detection logic, and built Angular dashboards.
- Improved scalability and reliability by approximately 30% and reduced security risks by approximately 35%.
- Delivered \$120K+ in estimated annual cost savings through improved reliability and security.

EXPERIENCE

Graduate Research Assistant | Software Engineer

West Virginia State University

08/2023 - 01/2025 WV, USA

- Designed secure backend systems for cybersecurity research platforms.
- Developed attack detection models for SQL Injection, Insider Threats, and APIs.
- Improved threat detection accuracy by 20–35% using ML models (LSTM, SVM, Random Forest).
- Built scalable data pipelines using Python, MongoDB, SQL, and REST APIs.
- Reduced false positives by approximately 25% through feature tuning and validation.
- Applied secure coding and threat modeling across research systems.
- Published 18 peer-reviewed research papers in IEEE and Springer journals.

Software Engineer

Capgemini

05/2021 - 08/2023 Bangalore, India

- Developed and supported Banking and insurance .NET applications using, C#, ASP.NET MVC/Core, and Web API.
- Improved application performance by approximately 20% through refactoring and query optimization.
- Implemented API integrations between internal systems and external services.
- Reduced production issues by approximately 30% through improved error handling and logging.
- Participated in Agile/Scrum development and peer code reviews.
- Supported production deployments and application maintenance.

Software Analyst

Appstix Technologies Private Limited

05/2019 - 05/2021 Bangalore, India

- Developed web applications and backend services using ASP.NET, C#, and SQL Server.
- Improved database performance by approximately 25% through optimized queries and procedures.
- Assisted in legacy system modernization, improving maintainability by approximately 30%.
- Reduced recurring issues by approximately 20% through code cleanup and validation.
- Supported full SDLC from development to deployment.

EDUCATION

M.S. in Computer Science

West Virginia State University

08/2023 - 05/2025 WV, United States

- Focused on secure software systems, web applications, and API security.
- Research and conference participation supported by Google and the U.S. Department of Energy.
- Presented research at IEEE and Springer conferences in the United States.
- Volunteered in NASA outreach programs, teaching high school students technology and cybersecurity basics.
- Performed vulnerability assessments for 10 nonprofits and small businesses across West Virginia, United States, via the Google Cybersecurity Clinic.

GPA

3.9 / 4.0

PROJECTS

Scalable Financial & Secure API Integration Platform

2021 - 2022 Sweden

Tech: C#, ASP.NET Core, Web API, SQL Server, Angular, OAuth2, JWT

Built **secure, scalable backend services** with ASP.NET Core; integrated external systems via OAuth2/JWT-secured APIs.

- Improved system efficiency by {27%} through optimized database access and enhanced API performance.
- Reduced API response time by approximately 25% and improved system stability by approximately 30%. Achieved \$80K+ in estimated annual cost savings through improved API performance and system stability.

Enterprise .NET Application & Database Platform

2019 - 2020 Bangalore

Tech: C#, ASP.NET MVC, Web API, SQL Server, JavaScript, HTML, CSS

Developed **enterprise .NET applications** and REST APIs with optimized SQL Server data models.

- Applied secure coding, validation, and error-handling standards.
- Improved query performance by approximately 20% and reduced recurring issues by approximately 25%.

CERTIFICATIONS

Microsoft Certified: Azure Developer Associate (AZ-204)Microsoft

PMI, 2023

Certified Agile Practitioner (PMI-ACP)

Project Management Institute (PMI), 2023

Cybersecurity Professional Certificate

Google -2025

Cybersecurity Research & Publications(2023-2026)

18 Research Papers in Cybersecurity and Secure Systems

6 Research Book Chapters (Springer / IEEE)

Research areas include:

Secure Coding Practices SQL Injection & Insider Threat Detection Microservices Security Cloud & Critical Infrastructure Security

Student Performance

President's List – Academic Excellence West Virginia State University, 2024

Dean's List – Academic Performance West Virginia State University,2023
